

## **Bruce Walker Nomination Statement 2018**

I live in Coventry and have been a City supporter since I first moved here over 50 years ago, maintaining my support during the periods when I was living and working away from the city. I am one of those who firmly believe that significant off-the-field change at the club, including an enhanced role for supporters in its operation, is the only way to re-establish the Sky Blues' place as a major club in a major city. If re-elected to the Board I would continue pressing for a change of ownership so that those responsible for the stewardship of the club have Coventry City FC and its long term development as their major priority. The Trust Board must continue to organise for future change while fighting for the real interests of our club in the present. If elected, I will do my utmost to help the Board and Trust Members to secure our club's present and future prospects.
